

Oumar Ammar

Software Engineer | Data Engineer

PROFILE

Software Engineer specialized in Data Engineering with hands-on experience in Python, SQL, ETL pipelines and dimensional data modeling. I have built data-driven solutions combining backend development, databases, APIs and analytics. I enjoy turning data into reliable and structured solutions and am motivated to grow further within modern data engineering, cloud platforms and scalable data infrastructure.

WORK EXPERIENCE

Junior Software Engineer

HFFIA | Netherlands

Dec 2025 - Present

- Building a paperless certification platform as part of a three-person development team.
- Developed backend services, REST APIs and ETL pipelines for certification and audit data.
- Designed dimensional data models using star schema and SCD for consistent historical data.

Software Developer Intern

TinyMobileRobots | Malling, Denmark

Aug 2024 – Jan 2025

- Developed and maintained customer-specific sports field templates using JavaScript and Cordova/Flutter in an international agile team.
- Refactored legacy code using SOLID and clean code principles to improve maintainability and code quality.
- Tested and validated solutions in real-world environments at schools and sports facilities to ensure accuracy and reliability.

Bachelor project For Hinanden – Community Help Platform

2025 - Present

- Built a community platform from scratch connecting people with local volunteers, reaching 400+ users during testing.
- Designed ETL pipelines and dimensional data models using star schema and SCD.
- Developed REST APIs, authentication, real-time notifications and PostgreSQL data models.
- Integrated a Machine Learning model and Power BI dashboards for prediction and analytics.

Software Developer

Rentop – Cleaning Business Platform

Jan 2026 - Jul 2026

- Built and deployed a full-stack booking and administration platform for a real cleaning business.
- Developed backend services and APIs for bookings, users and business operations.
- Took the solution from idea and architecture to production at rentop.dk.

EDUCATION

Diploma Engineer

Bachelor of Engineering in Software Technology with specialized in Data Engineering at VIA university college

Sep 2022 – Jan 2026

Entrance course to engineering programs

VIA University College

August 2021- Juni 2022

VOLUNTEER & OTHER

Volunteer Collector

• **Indsamler**2018- 2024

Danish Refugee Council ·

Participated in several fundraising collections for the Danish Refugee Council, supporting humanitarian initiatives through volunteer work.

SKILLS

- **Languages:** C#, Python, SQL, JavaScript/TypeScript.
- **Backend:** ASP.NET Core, REST APIs, gRPC, WebSockets.
- **Data & BI:** ETL pipelines, PostgreSQL, Power BI (DAX/MDX), dimensional data modelling, data warehousing, Machine Learning, MongoDB, SQLite, Databricks (learning)
- **Frontend/Mobile:** Flutter, Angular, Vue, Next.js, Blazor.
- **Cloud & DevOps:** AWS, Docker, Linux, Git / GitHub, CI/CD, Agile (Scrum / Kanban)
- **AI:** LLM APIs (OpenAI, Claude), AI-assisted development tools
- **Interests:** Personal software projects, running, fitness, padel, travel
